## ORBITSOUND ONE (P70)

**...The ONE audio solution for versatile and high fidelity listening...**

- The intelligent multipurpose audio solution can be positioned in multiple orientations to suit any environment without compromising audio quality
- First generation of a single-box audio solution with an integrated 5.25" subwoofer
- airSOUND™ technology provides a seamless and complete audio experience without a stereo sweet spot limitation
- Class leading slimness - 700mm x 173mm x 77mm (width x depth x height)
- Constructed in engineered wood and steel for substantial sound and audio fidelity
- A sophisticated audio solution that can be wall, surface mounted, or placed on a shelf (reversed)
- Can learn your TV remote within seconds eliminating the need to use two controls
- Minimises power consumption by intelligently shutting down elements that are not needed and auto resumes when audio is being played

## FEATURES

## ABOUT ORBITSOUND

Orbitsound Ltd. Is a small and dynamic British company based in London. We love great audio, and our goal is to create lifestyle focused audio products that are accessible in price for music loving Consumers, but that redefine the audio experience in the home. We believe that airSOUND™ technology is the best way to reproduce audio in today's living spaces.

## ABOUT airSOUND™ TECHNOLOGY

Orbitsound's founder, Ted Fletcher, a recording studio veteran with 50+ years of experience of recording, playing and designing studio equipment invented airSOUND™ in 2005. airSOUND™ is a revolutionary new way to create immersive audio from a single speaker box. By using special processing and side mounted speakers, the system creates authentic and real space in sound without being limited to any kind of stereo sweetpot or by using any artificial effects. This fundamentally challenges the accepted limitations of listening to music in stereo, and is how we believe all music should be heard.
